**Performance**

TAIT provides strategic technology consulting and managed services to government organizations, not for profit and commercial corporations. Our services help mobilize the right people, skills and technologies to help organizations improve their performance. TAIT is committed to excellence and creating innovative and flexible solutions for our State and Federal clients.

**Current Contract**

TAIT is contracted to provide senior systems administration consulting services in support of the Indigo IT prime contract with the Federal Housing and Finance Agency – Office of Inspector General (FHFA OIG or “the Customer”) for IT/Cyber Security Support Services.

**Added Value**

With TAIT’s strong knowledgeable team we were able to attack and put to rest multiple outdated pending tasks immediately. With Covid-19 present, transitioning to home offices became essential. TAIT resolved a critical VPN password error which allowed users to transition from office to home seamlessly.

**SBA**

TAIT is a Minority owned small business with a diverse technical background. Our company has multiple security clearances and certifications to support our clients.

**What We Do**

TAIT provides high level technical solutions so that government organizations Cyber Security and applications meet federal compliancy guidelines.

**Client Endorsement**

Technological Abstract IT technology skills are remarkable. TAIT use CIS benchmarks best practices when securing a customer’s IT infrastructure. TAIT executives have been implementing CIS benchmarks since 2017. TAIT has implemented numerous CIS benchmarks across many applications for Indigo IT. Acting as a subcontractor to a Federal oversight and compliance agency, TAIT was responsible for the oversight, implementation, and technical execution of a CIS compliance project that covered various Windows server (2012, 2012R2, 2016) and workstation (10 Ent) operating systems. TAIT resources completed the project on time and within budget over the course of a 5 month period that included a phased roll-out of all settings, execution of test plans at various stages, and coordination with a number of different internal teams to achieve success. The project was completed without network or system interruption. By implementing timely best practices, TAIT helps people, businesses, and government entities protect themselves against pervasive cyber threats. -Norm-
